Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6, 7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lammers.

Lammers in Figs. 5-8 discloses solenoid coil 5, plunger 4, and means for retaining the plunger 16. The operation as claimed is disclosed in col. 8, lines 12-34; col. 9, lines 1-22 and lines 55-67; and col. 10, lines 1-6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lammers in view of Murray.

Lammers discloses the claimed invention except for operation with rechargeable batteries. Murray discloses the operation of a magnetically actuated vacuum employed in medium-voltage distribution network having a battery back-up arrangement for the purpose of added reliability of operation (col. 10, lines 22-26, lines 52-55). Since

Lammers and Murray are both from the same field of endeavor, the purpose disclosed by Murray would have been recognized in the pertinent art of Lammers. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ a battery back-up arrangement for the purpose of added reliability of operation.

Allowable Subject Matter

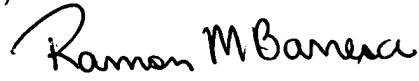

5. Claims 3-5, 8,11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: Lammers, the closest prior art of record, failed to teach or disclose wherein the controller simultaneously turns off both the switch the retaining means to stop retaining the plunger nor wherein the controller, after having turned on the switch, turns off the switch after a second predetermined period has elapsed.
